

OVERVIEW

KLB Consulting Group is an embedded WHS, compliance and assurance partner for organisations operating in high-risk environments — including construction, infrastructure, telecommunications and government — as well as sensitive sectors like schools and healthcare.

Unlike a consultancy that delivers a report and moves on, KLB remains embedded within your business — building systems, verifying contractor compliance, and maintaining audit-ready documentation for the life of the engagement. Our capability spans day-to-day WHS and contractor management through to formal ISO Lead Auditor-led assurance and ICAM-led incident investigation, giving clients a single, qualified partner across both operational compliance and independent audit assurance.

Where a project requires specialist trades outside our core scope, we act as Client Representative — coordinating directly with the relevant providers on the client's behalf, so our clients deal with a single point of contact rather than managing multiple relationships themselves.

ISO & ICAM ASSURANCE

- Exemplar Global-accredited Integrated Management Systems Lead Auditor capability across ISO 9001, ISO 14001 and ISO 45001
- Gap assessments and internal audits conducted against each standard on an ongoing basis, not as a one-off certification exercise
- ICAM Lead Investigator capability for incident investigation, root cause analysis, and corrective action development
- Independent audit assurance suited to certification bodies, Tier 1 contractors, and government panels requiring qualified third-party verification

CORE CAPABILITIES

WHS & Contractor Management

- Development and management of WHS documentation, including SWMS and risk assessments
- Subcontractor onboarding, compliance verification, and ongoing management
- Review of insurances, licences, and certifications
- Maintenance of subcontractor registers and compliance tracking
- Coordination of site compliance requirements and documentation

Document Control & Contract Management

- Implementation of structured document control systems
- Version control, registers, and workflow management
- Contract administration, variations, and subcontractor documentation

Client Representative

- On-site representation and day-to-day oversight, acting on the client's behalf throughout delivery
- Continuous monitoring of WHS and contractor compliance, with corrective actions tracked to close-out
- Coordination of specialist trades outside KLB's core scope, keeping clients to a single point of contact

Inspections & Compliance

- Coordination and documentation of site inspections and compliance activities
- Preparation of audits, reporting, and corrective actions
- Support for ongoing WHS compliance and system implementation

WHY KLB CONSULTING GROUP

- Embedded delivery model: we build lasting systems and capability, not a one-off report
- Qualified assurance: Exemplar Global Lead Auditor and ICAM Lead Investigator credentials underpin every audit and investigation
- Deep understanding of high-risk environments — construction, infrastructure, and sensitive sectors like schools and healthcare
- Systems designed to reduce risk, improve compliance, and maintain control for the life of the engagement

ENGAGEMENT & COMMERCIAL APPROACH

- KLB Consulting Group offers flexible and cost-effective support arrangements, including:
- Competitive and scalable service delivery aligned to project requirements
- Project-based or ongoing engagement options
- On-site client representation delivered alongside core WHS and compliance services, reducing subcontractor interfaces and project cost
